Hi Colin,

Here is a testimonial for you to peruse. Feel free to use all or parts of it as you wish.

Acorn Building was recommended to me by a person whose advice I trusted implicitly and who was aware of my personal circumstances and problems I had had with previous builders. I knew he would only recommend a very competent and capable builder to me.

And that proved to be the case. His recommendation, Acorn Building was the perfect choice for the construction of my large workshop, garage and extensive driveway.

Major excavation works were required and all excess ground material was cleverly used productively elsewhere on site.

The building works were well supervised at all times and the tradesman engaged were all highly efficient and highly skilled at their work. Only the most appropriate and quality materials were sourced and used.

Ideas suggested by Acorn Building easily satisfied and solved any whim or desires I had in relation to what I wanted in regard to the build. So my wishlist was always and very cleverly fulfilled.

The works were completed in a very timely fashion and the paperwork in regard to costings was impeccably presented and transparent. Colin was hopeful in bringing the cost below the amount quoted and he was very successful in achieving that goal.

I would not hesitate in recommending Acorn Building to any prospective client. They will be assured that the work done by Acorn Building will be done excellently well. It was easy to forge a good working relationship with them and the whole of my build was conducted in such a way that I felt no anxiety about it at all as it was completely hassle free.
